

SEMILLAS DEL SUR

Who we are

- Semillas del Sur S.A. was established in 2009 and has experienced an
- Ongoing growth.
- Semillas del Sur S.A., is the result of a new venture between a
- Uruguayan company, with over 60 years associated with the production and multiplication of seeds, and an Argentina's company, with more than 25 years associated with the breeding and seed production in off-season.
- Producing soybean and other seeds for the Northern Hemisphere and local market ever since.
- Located in Dolores, Uruguay, in the more influential production area.
- The company has a last generation and technology conditioning facility.

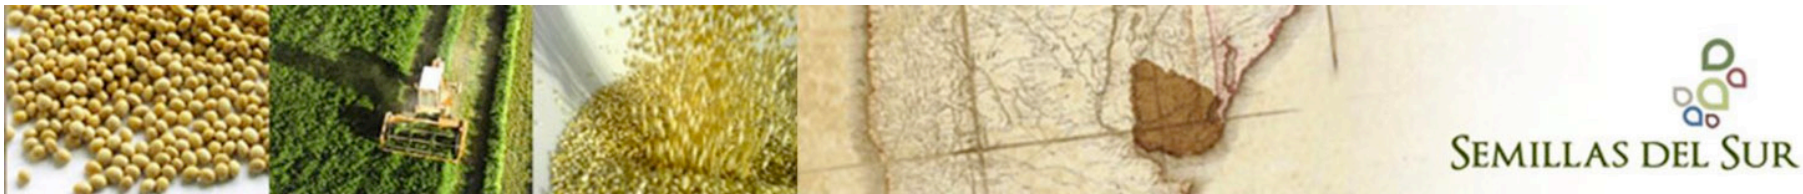

Who we are

- The company renders seed production services to customers all around the northern hemisphere and the local market.
- Achieving high quality of servicing and producing is our goal.
- Our commitment to the customer is sustained by two core values:
 - - Confidentiality.
 - - Traceability: Provision of efficient and precise information on every production process.

Who we are

- Satisfied Customers.
- Responsible and confidential information handling.
- Committed and permanent training personal.
- Passion in everything we do.
- Ethics and integrity.
- Growth and profitability.
- Enterprises responsible, always in a context of environmental preservation.
- Highly committed to fulfill governmental regulations and customers protocols.
- Highest available technology to optimize results.

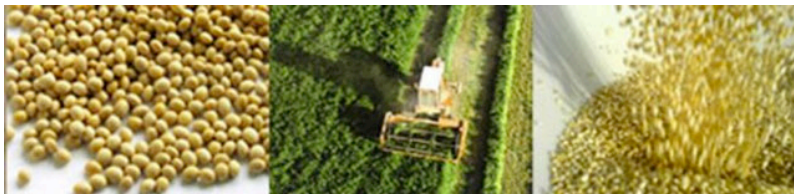

What we do

Semillas del Sur renders Counter – Season Production Services to the Northern Hemisphere Companies, including:

- **Seed production.**
- **Research trials:** We perform small increases and field trials for our customers, supporting breeding programs for the Northern Hemisphere Companies and local customers.
